

“Cité des Télécoms” 2d Doctoral Summer School : “ Mobility and Information Technologies: a long-term perspective ”

Place : Cité des télécoms – Parc du Radôme – 22560 Pleumeur-Bodou – FRANCE

Dates: Monday September 12th (starts at 6:30pm) till Friday September 16th (morning).

A few words about this summer school: Its objective is to provide doctoral students with an overview of relevant research results and of innovative tools and methodologies in the field of communication history. It is organised jointly by the Cité des Télécoms, the Paris-Sorbonne University and the Eindhoven University of Technology.

The summer school will focus on the relationship between mobility and communication history seen from a long-term perspective. This means that we are interested in projects dealing with the history of electronic systems connected or included in a mobility system broadly defined, but also in approaches of intermediality in history.

The academic organizers:

Dr Mathieu Flonneau (University Panthéon-Sorbonne)

Pr Pascal Griset (University Paris-Sorbonne)

Pr Gijs Mom (Eindhoven University of Technology)
